Presence Sensor

Presence Sensor, ON-OFF Function / Occupancy Sensor

The Cyaniris Microwave Presence Sensor for LED Panels is a simple energy-saving solution that uses light only when and where you need it. The sensor automatically switches the panel on and off and may be fitted to a selection of Kosnic LED panels. The sensor has a high sensitivity that will detect very small movements and stay illuminated for the duration of the hold time after presence ends. The sensor also has a built in light sensor which can be used to prevent the panel from switching on above a set light threshold.

CYS-PRS-PNL ()

Specification

Rated Power (W)

400
