

Nitro Surface

Nitro Surface 3.7V 2200mAH Li-ion battery for new DD EME CEC02LBL/N

Kosnic's Nitro Surface non-maintained LED emergency luminaires provide a simple self-contained emergency lighting solution. The emergency luminaires have internal Li-Ion batteries that will provide power for a three hour duration following a cut in the power supply. This version of the emergency luminaire incorporates automatic self-test technology that will perform regular automatic function and duration tests as required by EN 62034, reporting the results via a bi-coloured LED indicator built into the luminaire.
